MTA: Introduction to Programming Using Python - Certified 2019

AI Programming with Python

Nathan Bangwa

AI Software Developer : Helping you integrate AI into your application
Lubumbashi, Haut-Katanga, République démocratique du Congo

Résumé

Embarking on a dynamic journey from applied electronics to software engineering, my career is driven by a deep curiosity and passion for solving complex problems.

I find purpose in telling the story of Jesus, and I extend that love to everything I do. Helping young people discover their life mission and harness their talents is a rewarding adventure.

Today, I devote my technical genius to any project that can help humanity, in particular the development of artificial intelligence for health and education. You can also tell me about your project, and we'll see how I can help you move forward.

Currently, I'm developing a tool to automate the creation and deployment of RESTful Web APIs using Python and Google Gemini, which will be the backend engine designed to power a community platform and beyond.

Expérience

GoFamille
Jesus Storyteller
mai 2021 - Present (3 ans 6 mois)
Lubumbashi, Haut-Katanga, République démocratique du Congo

We use all human genius, especially technology, to tell the story of Jesus, to help young people know the unconditional love of Papa Good God, so that they may have eternal life, discover their life mission, and make effective use of the gifts and talents Papa has given them for His glory.

ENGINEERING AND TELECOMS CONSULTING SARLU
Software Developer Consultant - Odoo
mai 2024 - Present (6 mois)
Lubumbashi, Haut-Katanga, République démocratique du Congo

As an Odoo integration developer for AkibaPay, I helped facilitate online payments through various Congolese mobile money services, such as:

• Integrating AkibaPay with Odoo e-commerce, allowing businesses to accept payments via local platforms like Airtel Money, Orange Money, AfriMoney, and M-Pesa
• Integrating AkibaPay with Odoo Payroll, enabling companies to pay employees directly through mobile money services, streamlining payroll processes and ensuring efficient salary disbursement
• Building a scalable, user-focused solution tailored to the needs of Congolese businesses

Centre d'Excellence Salama
Software Developer Trainer | Python Language
août 2019 - octobre 2024 (5 ans 3 mois)
Lubumbashi, Katanga, Congo (RDC)

Design and deliver training programs to train individuals and teams in the Python programming language and its associated libraries and frameworks
